COLLECTION

CITY

PISCINE
LAGHETTO®

Characterized by a **contemporary aesthetic** and aligned with current residential architectural trends, featuring **clean and squared geometries**, and defined by a skillful use of finishing materials such as porcelain stoneware and metal, CITY was designed with the aim of harmoniously integrating into outdoor spaces through a visually balanced design with a lightened volumetric impact.

What is CITY?

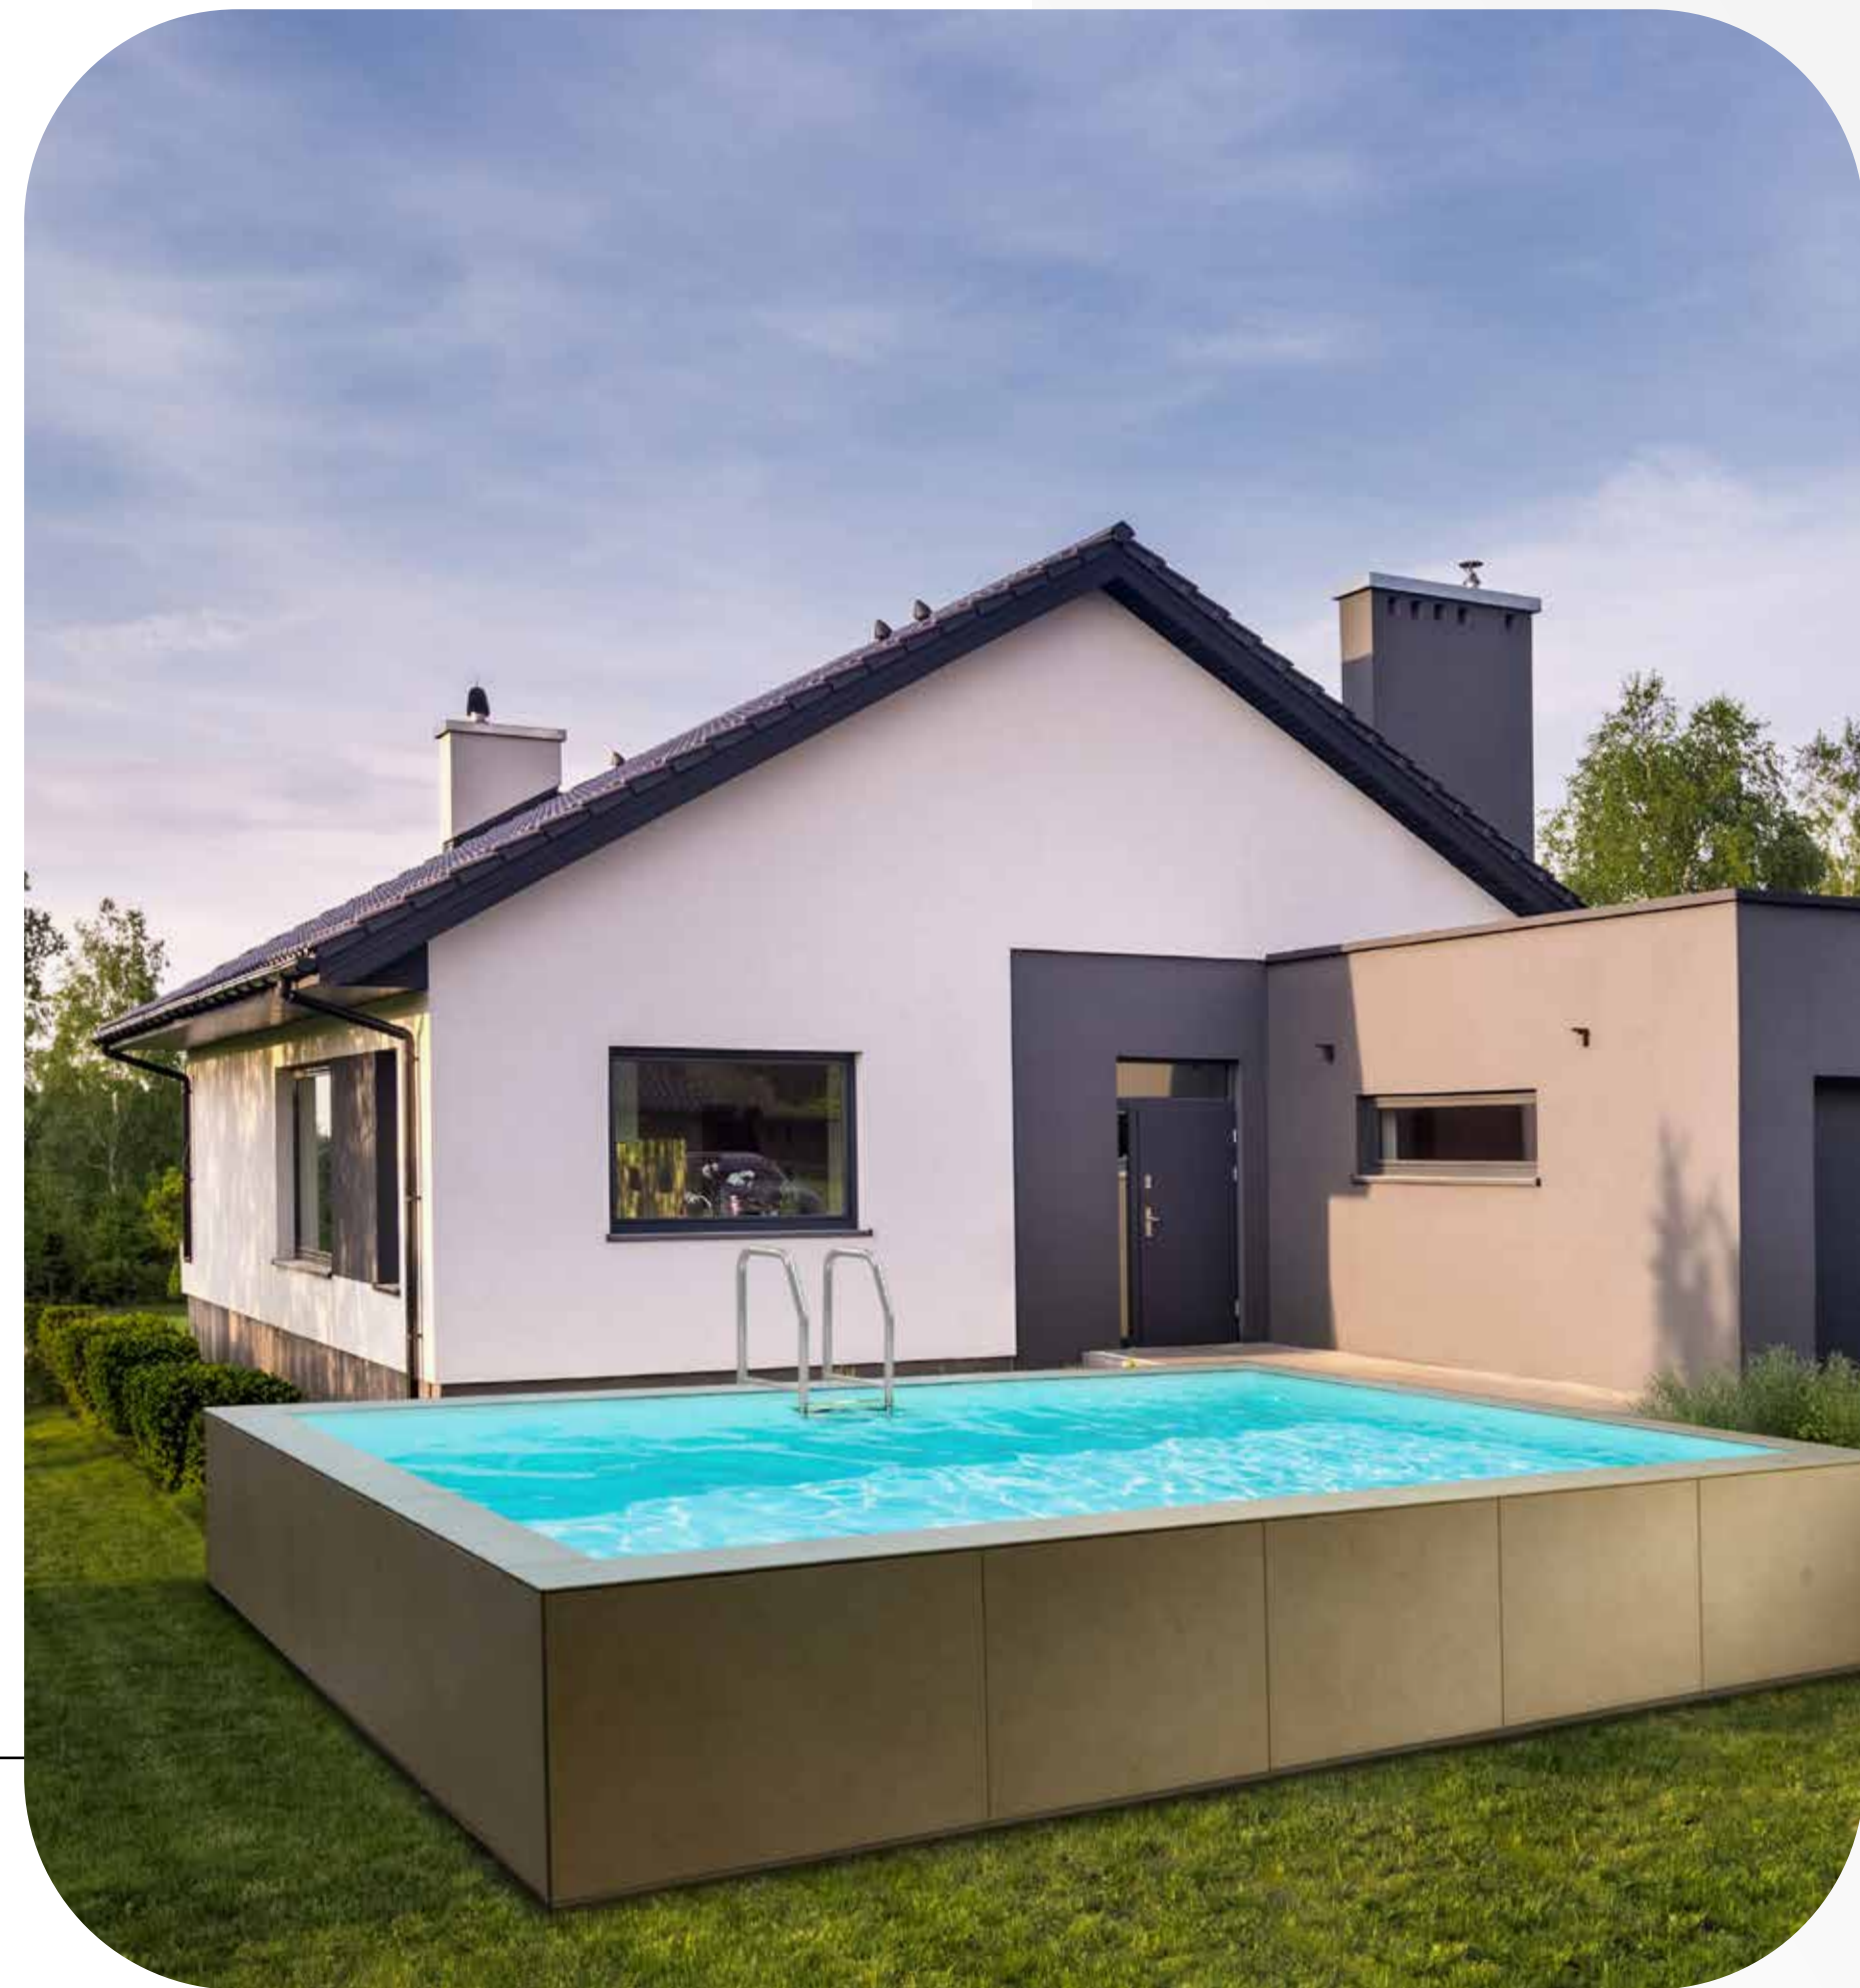

Intertwining geometries, contrasting volumes, and intersecting lines shape an architectural concept capable of transforming outdoor spaces, both urban and otherwise: it is following this philosophy that CITY was born, an above-ground and semi-inground pool designed by Sportium – Progetto CMR and realized in collaboration with Granitech®.

CITY

Water Architecture

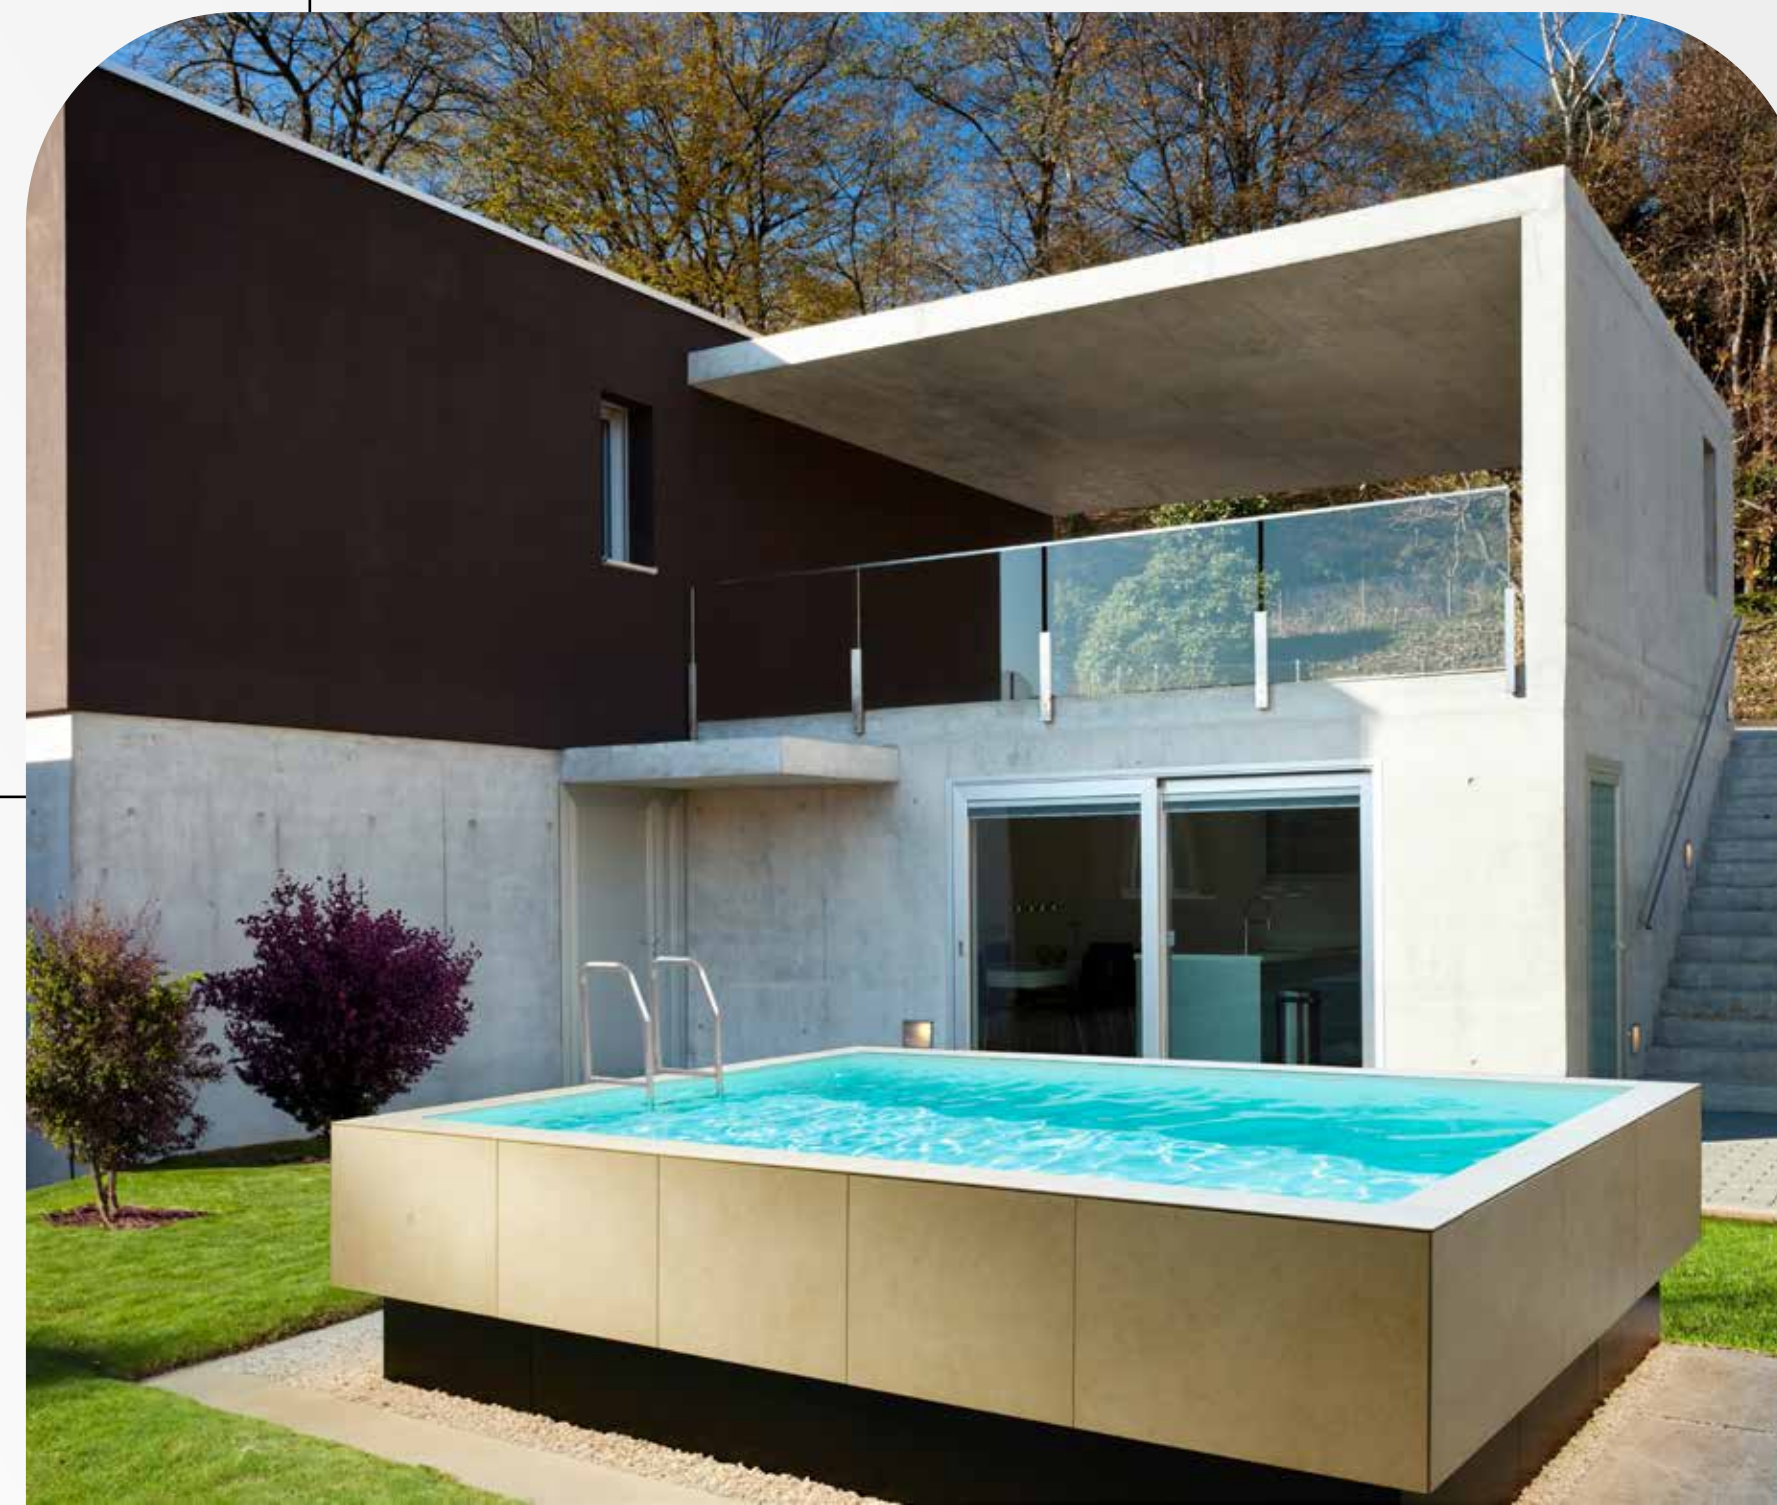

City is defined as a versatile product, adaptable for sports, relaxation, and wellness, without compromising the exclusive character and artisanal quality that are hallmarks of Piscine Laghetto.

Above-ground or semi-inground Two possible installation options

CITY is a **modular-structure** pool made up of prefabricated elements assembled on site. These elements support the pool liner, a waterproof membrane that is pre-welded and pre-cut to accommodate internal accessories.

The structure can be installed in two ways: **above-ground** or **semi-inground**.

COVERINGS

City is designed to be finished with the innovative X-Slab ceramic surfaces developed by Granitech®. X-Slab porcelain stoneware slabs are high-performance surfaces that enhance the natural strength of ceramic by 5 to 10 times.

This solution is achieved by combining the ceramic with a natural mineral laminate, which ensures greater resistance and durability while maintaining the same level of hygiene.
